SUMMARY

Software Engineer with experience developing enterprise web and mobile applications using React, TypeScript, Node.js, REST APIs, and SQL. Built real-time monitoring systems, analytics dashboards, and data-driven applications while collaborating across the complete software development lifecycle. Passionate about writing clean, maintainable software, solving complex engineering problems, and continuously learning modern technologies and cloud platforms.

SKILLS

- Programming Languages
JavaScript, TypeScript, Python, SQL
- Frontend Technologies
React.js, React Native, HTML5, CSS3, Tailwind CSS
- Backend Technologies
Node.js, Express.js, REST APIs
- Cloud & Infrastructure
AWS EC2, Virtual Machines, Windows Server, Security Groups, Cloud Fundamentals
- Databases
PostgreSQL, Supabase, SQL
- Developer Tools
Git, GitHub, VS Code, Cursor, Android Studio, Expo Go
- Business Intelligence
Microsoft Power BI
- Software Engineering
Object-Oriented Programming (OOP), API Integration, Cross-Browser Compatibility, Agile Development, Debugging, Version Control, Code Reviews

PROFESSIONAL EXPERIENCE

Software Developer – Dhanvith Ventures LLP

Nov 2025 – Present | Bengaluru, India

- Developed enterprise web and mobile applications using React, TypeScript, Node.js, REST APIs, and SQL.
- Built reusable frontend components and integrated backend APIs to deliver scalable software solutions.
- Developed real-time monitoring dashboards and analytics applications for enterprise products.
- Participated in user requirement analysis, application development, testing, debugging, deployment, and continuous feature enhancements.
- Collaborated with cross-functional teams in an Agile environment and participated in code reviews using Git.
- Optimized application performance, resolved software defects, and improved overall user experience.

AWS Builder Intern – Applogika

Dec 2025 – Apr 2026 | Bengaluru, India

- Provisioned and managed AWS EC2 virtual machine environments for development and testing.
- Configured networking, public IP connectivity, and security groups supporting cloud-based applications.
- Gained hands-on experience with cloud infrastructure and remote software deployment workflows.

Full Stack Developer Intern – Ideafloats Technologies

Sep 2025 – Nov 2025 | Bengaluru, India

- Developed responsive healthcare web applications and dashboard interfaces.
- Integrated frontend applications with backend REST APIs to deliver scalable software solutions.
- Participated in software testing, debugging, and continuous improvement of enterprise applications.

UI/UX Design Intern – Ideafloats Technologies

Jun 2025 – Sep 2025 | Bengaluru, India

- Designed wireframes, user flows, and high-fidelity interfaces using Figma.
- Collaborated with developers to convert UI designs into responsive web applications.
- Improved usability and user experience through iterative design and stakeholder feedback.

PROJECTS

1. Fleet Tracking & Management System

Real-time fleet monitoring platform used to track vehicle activity, visualize operational data, and support management decisions, developed using React, TypeScript, MQTT, Maps Integration

- Developed enterprise dashboard interfaces using React, TypeScript, MQTT, and REST APIs.
- Built real-time monitoring features for fleet operations and analytics.
- Designed reusable UI components supporting enterprise monitoring workflows.

2. Enterprise Analytics Dashboard

Data management and reporting platform used to search, analyze, visualize, and manage large datasets through a unified dashboard developed using React, TypeScript, Node.js, Express.js, Tailwind CSS

- Developed a full-stack enterprise analytics dashboard using React, TypeScript, Node.js, Express.js, SQL, and Tailwind CSS.
- Built search, reporting, filtering, and visualization modules for efficient data analysis.
- Integrated backend APIs and SQL-based workflows supporting scalable enterprise reporting.

3. Offers Unlimited

Cross-platform mobile application that helps users discover deals, offers, and business promotions across multiple locations. (iOS & Android) Developed using React Native, Supabase, REST APIs

- Developed cross-platform mobile applications using React Native and REST APIs.
- Integrated Supabase backend services for authentication and business data management.
- Built administrative dashboards supporting business operations and content management.

4. GPS Simulator

Android application designed for GPS location simulation and location-based testing. Developed using Java, Android Studio, Google Maps APIs

- Developed Android application features using Java and Google Maps APIs.
- Built interactive GPS visualization and location management functionality.
- Implemented coordinate export features supporting testing workflows.

CERTIFICATIONS

1. Amazon Web Services (AWS): AWS Technical Essentials, AWS Partner: Agentic AI Essentials

2. Anthropic: Claude with the Anthropic API, Claude Code in Action
3. Python for Everybody – University of Michigan (Coursera)
4. React.js Bootcamp – DevTown
5. Microsoft Power BI – Skill Nation

EDUCATION

Bachelor of Computer Applications (BCA), Aug 2022 – June 2025

RNS First Grade College, Bengaluru

CGPA: 8.35 / 10
