SUMMARY

Software Developer with experience building real-time monitoring systems, analytics dashboards, mobile applications, and data management platforms. Skilled in front-end and product development, responsive UI design, and workflow optimization.

Experienced in **AI-assisted** development and focused on delivering solutions quickly that improve monitoring, management, and decision-making.

SKILLS

- **Product Development:** Monitoring Systems, Analytics Dashboards, Mobile Applications, Data Management Platforms
- **AI-Assisted Engineering:** Claude Code CLI, OpenAI Codex, Rapid Prototyping, Workflow Automation
- **Tools:** GitHub, VS Code, Cursor, Antigravity, Android Studio, Expo Go

EXPERIENCE

Software Developer – Dhanvith Ventures LLP

Nov 2025 – Present | Bengaluru, India

- Contributed to the development of web and mobile products across analytics, monitoring, and business management domains.
- Worked on frontend development, database-connected applications, and product feature implementation.
- Collaborated on product design, testing, deployment, and continuous feature enhancements.

Full Stack Developer Intern – Ideafloats Technologies

Sep 2025 – Nov 2025 | Bengaluru, India

- Contributed to the design and development of healthcare technology platforms focused on digital health management and patient-centric experiences.
- Built responsive interfaces, dashboard components, and data-driven features for healthcare applications.

UI/UX Design Intern – Ideafloats Technologies

Jun 2025 – Sep 2025 | Bengaluru, India

- Designed wireframes, user flows, and high-fidelity interfaces using Figma.
- Worked closely with developers to translate designs into responsive web applications.
- Contributed to user experience improvements across healthcare and business platforms.

PROJECTS

1. Fleet Tracking & Management System

Real-time fleet monitoring platform used to track vehicle activity, visualize operational data, and support management decisions developed using React, TypeScript, MQTT, Maps Integration

- Built dashboard interfaces for real-time fleet tracking and monitoring.
- Implemented analytics visualizations and reporting features for operational insights.
- Designed responsive management workflows to improve visibility of vehicle activity.

2. Offers Unlimited

Cross-platform mobile application that helps users discover deals, offers, and business promotions across multiple locations. (iOS & Android) Developed using React Native, Supabase, REST APIs

- Developed user-facing features for a mobile platform that aggregates retail offers, promotions, and business advertisements.

- Built user experiences for discovering offers, promotional campaigns, and store information across multiple businesses.
- Developed an admin dashboard for managing promotions, catalogues, and business data with CRUD operations, content management, and data administration workflows.

3. Enterprise Analytics Dashboard

Data management and reporting platform used to search, analyze, visualize, and manage large datasets through a unified dashboard developed using *React, TypeScript, Node.js, Express.js, Tailwind CSS*

- Developed analytics dashboards and reporting interfaces for managing and analyzing large-scale datasets.
- Built search, filtering, and reporting capabilities to enable efficient data exploration and decision-making.
- Integrated SQL-backed data workflows, reporting systems, and management tools to support efficient data operations.

4. GPS Simulator

Android application designed for GPS location simulation and location-based testing. Developed using *Java, Android Studio, Google Maps APIs*

- Built interactive map features for plotting, recording, and visualizing custom coordinates in real time.
- Implemented coordinate export and location management capabilities to support testing and analysis workflows.

CONTINUOUS LEARNING COURSES

1. Python for Everybody – University of Michigan (Coursera)
2. React.js Bootcamp – DevTown
3. Microsoft Power BI – Skill Nation

EDUCATION

Bachelor of Computer Applications (BCA), Aug 2022 – June 2025

RNS First Grade College, Bengaluru

CGPA: 8.35 / 10

EXAMPLES WORK

With permission from the organization, I have shared a few screenshots/website links of the work that I have done here:
